

Memo 6th August 2021

Elite-Combo

We have taken the opportunity to implement a couple of final tweaks before the enhanced Elite-Combo goes live on August 7th 2021.

As per the note in the spreadsheet, we have tightened up the Elite Combo algorithm in regards to:

- the form/scenario figure of the potential qualifier
- a four-bets-in-a-race cull procedure
- and prevented betting against \$250 Combo qualifiers:

The Master Spreadsheet has been updated.

Here is the example we listed in the explanatory newsletter during the week was July 17th at Flemington::

eliteracing			E-Combo / C-C

The most notable omission on that day is Bartholomeu Diaz which won at \$26 and the profit on that particular day was obviously reduced quite a bit.

But overall, the changes make a positive impact on strike rate and profit% rate and importantly reduce the 'risk' on any given day.

That has allowed us to go with a single column for the 'per \$1000 bank' bets instead of three (*max-risk, ave risk or min risk*).

The Master Spreadsheet is up to date and we will upload pdf results printouts when we can.

Here are the meeting by meeting performance stats of Wednesday's version as compared with the version updated on Aug 6th.
