2021-2022 Season

We have undertaken the customary end of season evaluation where we take the opportunity to fine-tune things to eradicate confusion and enhance your raceday experience and profitability. We have completed Mel and will be looking at Sydney soon.

Summary

I know some members are too busy to read newsletters. Here is a summary so that you know what is happening in this new season (from next Saturday). If you do have a question, it will most likely be addressed below. *We can only spend time on questions that aren't answered in this newsletter.*

- The Mel Combo algorithm is enhanced
- Mel Colour Coding strategy enhanced
- Mel Elite-Combo betting now includes the Colour-Code 2022 strategy
- Mel Raceday list of bets is presented differently.

Elite Combo

Spreadsheet users are familiar with these Mel Combo changes/tweaks we implemented before last week's Caulfield meeting.

This is a screen shot taken from the spreadsheet which explains those changes.

COMBO '22

- 1 If (CN) G% <100 AND (CP) Total <100 then No Bet (Noted as 50 in (CU)
- 2 Eliminated 3yo bets IF Combo Final Bet <200.
- 3 No Bets if column AT "Poor" or Fair (Even if all four plans qual)
- 4 If >2 Combo Bet Final in race, do not back if CW <200
- 5 Benchmark Races: (BZ) Final Filters = "OUT Restr <90" BUT EFilter (CL) >50 AND G% (CN) 100 then \$120 Bet
- 6 If CC = 150 BUT only ONE Qual Plan AND NOT E-Filter Then Reduce 150 to 100.

In English (sort of).

Note: it is not necessary to understand these mechanics. All the bets are worked out on race morning for you. These are presented for the sake of completeness and transparency.

- 1 If G% is less than 100, and the total of the four contributing plans is less than 100 then no bet.
- 2 3yo races are eliminated unless the Final calculated Combo Bet (in column CW) is \$200 (or more)
- 3 We are no longer letting through column AT "Poor" horses if they had contributions from all four strategies.
- 4 Multiple bet races: If MORE than 2 final calculated Combo Bets (in column CW) then reject if that bet is less than \$200.
- 5 Benchmark less than 90 Races. If races are marked "Out Restr <90" in column BZ, BUT the horse is Elite Filter bet greater than 50 AND G% 100 then bet \$120.
- 6 If Final Combo Bet is \$150. Colour Code =150 BUT it is the ONLY qualifying plan AND NOT Elite Filter then reduce bet to \$100.

On their own they are quite minor changes but they eradicate some niggling idiosyncrasies that were holding the plan back. A simple comparison of the original Combo and the enhanced (E-Combo) for 2021 shows an increase in profit percentage from 54% to 95%.

Colour Coding

I know a couple of members have been surprised by the sustained accuracy of the Colour-coding concept.

Colour-Coding Example from 17th July 2021

6	1600m Hcp \$125k
3:00 PM	Horse
1	DJANGO FREEMAN
7	BARTHOLOMEU DIAS
2	DICE ROLL
4	ADELAIDE ACE
10	FUNDRAISER
3	SIERRA SUE
9	KINANE
5	HI STRANGER
6	THINK WE'RE DUE
11	DENERO
8	DEGRAVES

We now have 247 colour-coded city races going back to October 2020.

171 green selections won. That means we are getting 69% 'green' winners.

Betting on the whole lot has never been recommended but concentrating a level \$100 on up to the top-4 rated 'greens' in races where there are no more than 5 Green and no more than 5 blue produces a **profit of \$6,747**. That's great profit from such a wide net, July alone made \$1,620.

We have put forward a couple of Colour-Code strategies along the way and **kept records in the Master Data Spreadsheet for you.**

We also maintain a dedicated [Colour-Code Spreadsheet online](#) in your members results area (*same page as the Master Data Spreadsheet*). We have been keeping track of two strategies.

C-C Plan 1:

These are the C-C (Colour-Code) ones that contribute to the Combo Strategy.

These rules have been listed in the spreadsheet for all of 2021. (*Interactive: you can change or turn each one on/off and immediately see the new result*).

C-C Plan-1 Stats October 2020 to July 2021

180 Bets, 49 Winners, 27% winners @ \$5.67.

Profit 12,695 (+ 57%)

C-C Plan 2:

Also included in Master Spreadsheet. Three Rules: No Bush, Less than 5 Green, Less than 6 Blue.

Bet \$100 level up to 4th rated selection. (Can be 4 in a race)

Plan-2 Stats October 2020 to July 2021

499 Bets, 112 Winners, 22% winners @ \$5.19.

Profit \$9,372 (+ 19%)

Mel Colour-Coding Where to now?

The amount of data has doubled since we formulated the above plans. We are stoked that the strike rates and profits have held up in real-time since.

If anyone else had come up with the concept and could sustain our C-C performance figures they would have a leading-edge, profitable stand-alone racing service.

We have been delivering them each meeting, watching and waiting. Some very astute members have been raving about the profits from the C-C concept but most of us haven't really got true value from the concept – except some input into the Combo betting strategy.

Let's change that!

Firstly here are my suggested Colour-Code rules going into the 2021-2022 season. Remember we are talking Melbourne colour-coding (we are still researching Syd).

Mel Colour-Code 2022 Rules (C-C 2022)

We have settled somewhere in between the above two strategies.

- Mel City Only
- 7 or more starters
- Maximum of 7 Colour-Coded horses (Green + Blue)
- Green: Maximum of 5 in the race
- Blue: Maximum 5 in the race.
- Bet up to top-4 rated green qualifiers.

C-C 2022 Stats

Stats October 2020 to July 2021

424 Bets, 99 Winners, 23% winners @ \$5.47.

Winner in 73% of coded races.

Profit \$11,785 (+ 28%)

There is a dedicated Colour-Code spreadsheet online with the complete data since October 2020. *Mel Members area/results. The data is also recorded in the Mel Master Spreadsheet.*

Here is a meeting by meeting analysis of C-C 2022 going back to when Colour-Coding started in October 2020.

Synch Enhanced Combo (E-Combo) with Colour-Coding (C-C 2022)

A lot of members **don't like backing the same horse twice** if it qualifies with different strategies.

My proposal is to utilise the high-action Colour-Coding 2022 strategy explained above in synch with the Elite Combo Plan to provide extra separate action on strong 'definite' winning chances (*that's what the green ones are*) that don't get their chance with the Combo Strategy.

- Eliminate the C-C 2022 qualifiers that are Elite Top-Rated. (All Elite top-raters have been analysed by the Combo strategy and either accepted or rejected).
- From the remaining qualifiers of the Mel Colour-Code 2022 plan, eliminate the ones that qualified for an Elite-Combo bet.
- Concentrate on Open Hcps and Mares and include BM races above 80. No set weights, WFA etc.
- Level-Bet the remaining C-C 2022 qualifiers.
- Minimum AM odds set at \$2.50

The best part is that the **CC-2022 bets are at their best at times when Combo is having a down period.**

For example, this idea produced \$3,420 net profit in **July** v's Combo (as listed) - \$220.

This is intended as a strategy to compliment Combo Plan by snaring the big value green Colour Coded selections.

You could operate this colour-code plan on its own but it will duplicate many Combo bets. The above rules get rid of the duplication problem completely.

The Plans In Real Life

Firstly let's look at the Combo Original v's the Enhanced Combo named E-Combo ("E" for Enhanced)

The Original Combo bets showed flaws when the going got tough especially in June and July. Many logical suggestions were offered by members and some simply had to be taken on board.

The new version (E-Combo) got through the June-July period with minimal loss, certainly much better than the original.

But whist this was going on, the **colour coding was going gangbusters!**

Now look at the Enhanced Combo (E-Combo) monthly performance **PLUS** the Colour-Code 2022 bets combined.

They go hand in hand beautifully and iron out each other's down periods.

The right hand combined-profit column shows the power of synching the two strategies by betting the E-Combo as listed and a simple 1.0% level bet on the C-C 2022 qualifiers.

Betting E-Combo + CC-2022 from one bank.

June -July 2021

Note, the total outlay of the E-Combo with the CC-2022 is only marginally more the Original Combo on its own: \$5070 v \$4050. The outcome is considerably healthier.

Raceday Presentation 2021-2022 Season.

As spreadsheet users have been observing, the enhanced Elite Combo betting strategy (E-Combo) has been live for the past two meetings.

The Colour-Code 2022 (C-C 2022) is set up ready to go from the first meeting of 2021-2022 season (Aug 7th)

We have decided to simplify the raceday email by reducing the images to just the qualifying bets.

The previous list of 'possible' qualifiers with eleven extra columns was confusing members. Several horses listed on each raceday list were actually rejects. Spreadsheet users can always access the extra data anyway.

What do I Bet On in Season 2021-2022?

The Mel E-Combo is so named because it draws on a combination of several strategies.

Adding the C-C 2022 is 100% in line with what the Combo concept is all about.

From now on the Elite Combo Strategy is in effect E-Combo Plus C-C 2022.

1. **Min Risk:** In a conservative, ideal world I would strongly suggest a full main bank for the Mel E-Combo Bets and a separate bank for the C-C 2022 qualifiers. For \$10k-bank punters to bet all qualifiers from both plans that requires a \$20k bank.
2. **Ave Risk:** Allocate 1.5 times the 'normal' bank. \$10k-bank punters would allocate \$15,000 to finance their bets on all qualifiers from both plans.
3. **Max-Risk:** Allocate your single 'normal' bank to bet all qualifiers. \$10k-bank punters would be betting all qualifiers from both plans with their \$10k bank.

To simplify your betting according to your chosen degree of risk, we have included the **three bet-size calculations (Max, Ave and Min risk) in the right hand columns of the raceday list calculated per \$1,000 bank.**

Whatever your actual bank and your chosen risk level, you can readily work out your personal bet size.

Let's look at Flemington on July 17th

The E-Combo and C-C 2022 bets are listed in their own column to enable members to clearly see the source. Some members will want to bet just the E-Combo qualifiers others will bet the E-Combo and the C-C 2022 qualifiers.

In case of the latter, there can be up to four bets in a race – not often but race 6 above is a case in point. Just repeating, the Elite Combo Strategy is in effect E-Combo **Plus** C-C 2022.

I recommend you go through all the bets listed on the results printout provided. You will soon find out what suits you best.

Just be forewarned that on some days the outlay for Max Risk punters can be a fair whack of the bank.

The July 17th example above was an average day as far as outlay goes but 5.0% each from two strategies means 10% on the line in one meeting as can be seen by adding the nine \$1,000 bank Max Risk % column bets (= \$100)

Refer to the meeting-by meeting results of the 277 bets above.

I have assumed just a \$10k single Max-Risk % bank. The average outlay per meet was about \$700. The biggest loss on a given day was 7.5% of the bank. The largest outlay was 23% of a single bank on Nov 14th 2020.

Each individual member has to weigh up how aggressive/conservative they want to be and how the occasional multiple-bets-in-a-race (up to 4 bets) situation fits in with their betting psyche.

Spreadsheet Betting Records

In the Master Data Spreadsheet we record the bets of C-C 2022 and E-Combo separately. They are then combined and recorded as the **official Elite Combo Strategy**. All assume bets from a \$10k bank.

The bets from the 2022 version of the Colour Code concept are recorded here:

Elite Filters?

The evolution of the Combo was a watershed moment for the Elite Filters.

The Elite-Filters that were rejected by the E-Combo (Oct 2020 to July 2021) only won 9 out of 50 @ the short average odds of \$2.72. The loss on those Elite-Filter rejects is 51% (- \$2,550 level \$100).

The Elite-Filters that do qualify as E-Combo bets are winning at 39% @ 4.00.

The E-Combo is drawing on the Elite-Filters concept and the Elite Filter horses that qualify for the E-Combo are already listed for you on the E-Combo list. It is futile listing the Elite-Filter rejects anywhere.

For those who want to know the rejected Elite-Filters, they are still included in the Master-Data spreadsheet.

Larry's Best

I have sacked Larry's Best. "Gut Feeling" bets have no place in the current level of professionalism that we have reached with the E-Combo.

I have been banging my head against the wall tipping E-Combo rejects as Larry's Best which is not only confusing, it is contradictory to my advice. Only 3 out of 34 of those managed to beat that hoodoo.

14 Larry's Best were E-Combo qualifiers, five of those won for a nice profit. But we were already on them because they are E-Combo qualifiers.

Less is more now that we have the powerful Elite-Combo (E-Combo + C-C 2022) concept working for us!

Elite Multi Betting

We provide all the selections in order along with the recommended Multi base strategy on every raceday message.

Many members had a very big month using our suggested multi strategy. In the coming weeks we will be getting the results spreadsheet up to date and reporting so newer members are up to date on this time-proven Elite method.

Sydney next!
