

Platinum E4 and Monster Unification

Late last week we finally completed the 2024 E4/Monster amalgamation as promised.

On the first day (Saturday) we had Platinum E4 bets in three races for two winners (Young Werther \$2.35 and Eternal Flame \$4.20) and a modest profit of 1.46% for the day.

It is very unusual to have multiple 2-bet races on the one meeting as you will observe from the printouts and spreadsheet at the end of this newsletter.

The E4/Monster unification algorithm is underpinned by actual race-morning data from Mel and Syd back to January 2021. The input from Nationwide Adelaide and Brisbane became available from the start of 2022-2023 racing season (Aug-2022).

Here are the basic stats Jan 2021 to March 2024:

E4 2024 Betting

245 betting meetings (*65 meets per year*)

1028 races

1255 Bets

5.13 bets per meet

1.22 bets per race

515 Winners @ \$3.94

50% winners to races

41% winners to bets

Bet: (\$10k bank) \$152,480

Return: \$253,556

Profit: \$101,076

PTO%: 66%

Ave Bet Per Meet: \$608

Ave Profit Per Meet: \$412

Ave Profit Per Week \$608

Two-Bet Races

Over the 3+ year period, there have been 95 races with two qualifying bets (*like R8 at Flem on Saturday*). The 79 winners means 84% of those races had the winner. The profit in two-bet races is +77%.

In that 38 month period, there were also four three-bet races. They all had the winner but the profit was 44%. I presume many members will probably not be betting on those but they will be listed and it is your call.

Betting

The bets can range from 1.0% to 2.0% of the bank. On Saturday they ranged from 1.2% to 1.6% as listed on the Platinum E4 bet list.

Losing Runs

The December 2023 thru Jan 2024 period was very tough for all plans and this one gave up 18% in those two months. Feb and March has clawed back 6.8%.

Mind you, the season from Aug 2023 to end of November was up 92%. The net 81% bank increase this current season is significantly better than Monster or E4 could do on their own in the same period.

Losing streaks are a fact of professional punting. Stick with the listed percentages and there will be minimal pressure during those times.

Results Printouts

We have produced a spreadsheet for members as well as several pdf printouts. The E4 strategy draws on the **current** algorithms of all contributing strategies. Cross referencing with old algorithms' as-listed data is not possible.

Watch our \$10,000-Bank Bets in Real-Time

This joining of the strengths of E4 and Monster strategies is the most exciting concept we have seen - capable of bigger and faster gains than earlier versions (which, in their own right, doubled the bank in winning periods).

We we can't wait for it to continue on from Saturday and prove itself in real-time over the coming months and years.

We are going to apply a **\$10,000 private bank** to bet on each and every qualifier to show it off as intended - every qualifying bet as listed at Top-Flucts.

We will upload the bet slips for Platinum members to view online and you can compare with your application of the plan.

If you can get BOB or Odds-Boost or Money-Back bonuses etc, you will do even better.

We've done a power of work so **let's have some fun and reap the rewards.**

Regards,

Larry and Richard
